

Open Source and the Right Side of the Brain

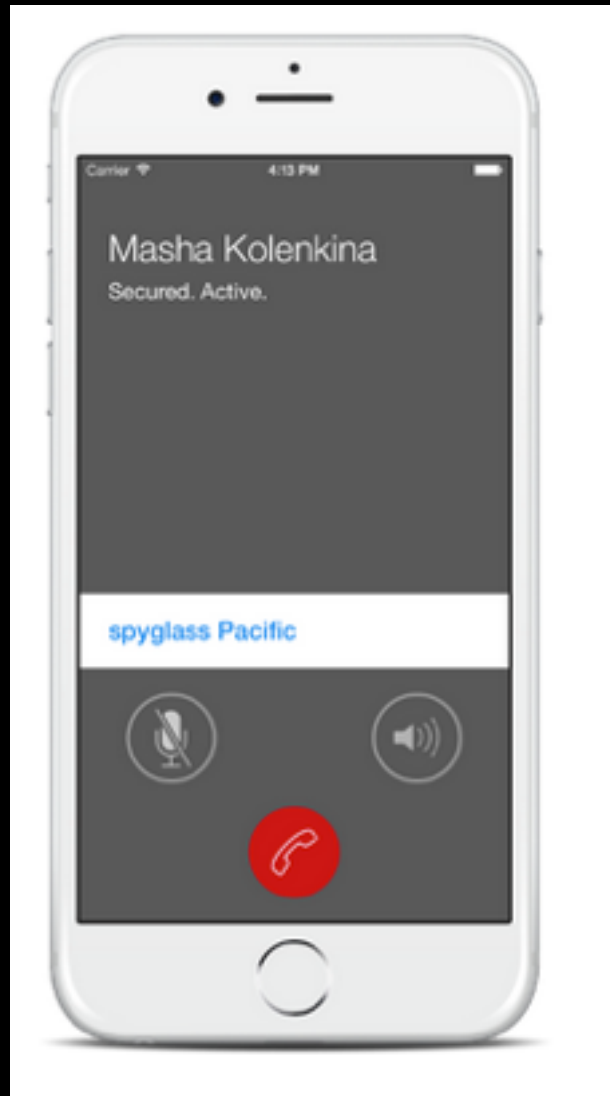

Images are powerful. The brain processes them quite differently than code.

Good Design Makes the Difference.

Open Source projects that get it right.

Signal. whispersystems.org

Moxie Marlinspike

Moxie works on the protocols, the Android clients, and the server software. He has been contributing to Open Whisper Systems since it was Whisper Systems, formerly ran the product security team at Twitter, started the first cloud-based password cracking service, and has published a number of attacks on secure protocols like SSL and MS-CHAPv2.

Tyler Reinhard

Tyler oversees brand development and design, and works directly on Signal for iOS and the browser. If he's not complaining about the weather, he's usually advocating on behalf of our users. He is also the founder of Mask Magazine, a youth culture + style magazine.

Lilia Kai

Lilia develops the browser extension and maintains the website. She comes to Open Whisper Systems from the EFF, where she built online advocacy tools for activists fighting for a better internet. In her spare time she practices yoyo tricks and DIY home automation. She also serves as chief of sticker operations.

Frederic Jacobs

Frederic leads the iOS development. He daylights at the Swiss Institute of Technology (EPFL) and plays around with cryptography, censorship resistance and blockchains.

Riya Abraham

Riya supports you, the user, and is also a cheerleader for your feature requests. She used to run automated strategies in the derivatives trading world, and currently moonlights as a Hatha & Vinyasa yoga teacher.

Contributors

We're always looking for ideas from everyone, including **mental health advocates**, **health professionals**, **software developers**, and **user experience designers**! Please email [us](#) and we'll connect with you! You will be invited to participate in our [Slack](#) page, our primary communication tool. Be sure to fork our repository hosted on [GitHub](#)!

Julia Nguyen

Being open and honest about my journey with obsessive-compulsive disorder, anxiety, and depression helps me to accept myself and reach out for support. My hope is to encourage others to feel more comfortable about sharing their experiences. I created if me as a way to tackle the problem of doing so in daily life.

📍 Toronto, Canada 🔗 [julianguyen](#)

This is only the beginning.
